

# Picture-perfect Alaska

## How do you capture Alaska's magic?

We asked Princess photo pros for their top tips so you can snap the best shots on your cruise. Use these and share with your shipmates to create the ultimate Alaska scrapbook.

### Stay weather-ready

Dress in layers and protect your gear with a waterproof bag.

### Gear up

Grab a telephoto lens (300mm+), a tripod and a fast camera to catch the action.

### Patience is key

Wait for the right moment to capture that perfect shot.

### Chase the light

Shoot during golden hours (early morning/late afternoon) for the best lighting.

### Keep your distance

A telephoto lens lets you shoot wildlife from afar – safely.
